

## Services

- ▶ Ideation  
Bring your ideas to physical reality
- ▶ Voice of Customer  
Target specific end-user requirements
- ▶ Reverse Engineering  
Know your competition
- ▶ Design for Manufacturing  
Realize quality through robust design
- ▶ Solid Modeling  
Check form, fit, function in 3D virtual space
- ▶ 3D Scanning & Digitizing  
Turn print-less parts into solid models
- ▶ Rapid Prototyping  
Let physical parts sell your ideas
- ▶ Engineering Computation  
Balance product performance versus cost
- ▶ Project Management  
Keep your project on track

### Marker-2-eMedia Mondays

First-timer to Art-2-Part? Take our new interactive whiteboard for a test drive over a complimentary 1 hour brainstorming session. We'll come to your site (companies w/i 1 hour of Grand Rapids, MI, otherwise online via the web) and host ideation on the subject of your choice. At the conclusion, we'll present you with a complete electronic session record that you can annotate, mark-up, edit, and/or copy and paste for integration into other materials. To take part in this new opportunity, use our web site's Contact Us page to schedule a Marker-2-eMedia Monday today.

The nature of innovation is changing. Development cycles have to be both faster and cheaper than ever. It's a rare company that can hold on to existing customers with *product evolutions* and simultaneously attract new customers through *technological revolutions*. Do both at the same time, let **Art-2-Part Product Development** be your enabler.

We are a consortium of multi-disciplinary engineering professionals engaged in the synergistic process of bringing ideas or "art" to physical reality in the form of "parts." Turn over for a look at our a la carte approach to product development.
